Keywords/Descriptors
Authors should also suggest five keywords or descriptors that clearly indicate the subject matter of the article.
For example: Diversity, Sinsablegbini Forest Reserve, Undisturbed, Encroached, Burnt
These should immediately precede the introduction.

Subsequent pages of the manuscripts should contain the main work: the introduction, problem/theme, methods, findings/arguments, conclusion(s) and the full list of all references used.

Clearly indicate heading levels throughout the main work and should be as follows:

Main Headings: Do not number headings and subheadings. Do not dent paragraph. Capitalize the first letter of each major word and bold the text. For example, ‘The Library and Information Dissemination’

Subheadings: Capitalize the first letter of each major word, bold and italicize your text. For example, ‘Sources of Information’

Other Subheadings: Capitalize the first letter of each major word and italicize your text. For example, ‘Online Sources of Information’

Abbreviations
Abbreviations in the manuscript should clearly be defined by giving the name in full on its first occurrence followed by the abbreviation in parentheses. For example: World Health Organization (WHO). Subsequently only the abbreviation may be used. Author should ensure consistency of abbreviations throughout the article.

Figures, Diagrams and Graphs
All necessary illustrations such as photographs, diagrams and charts or graphs should be referred to in the text as figures. They should be given Arabic numerals numbered consecutively in the order in which they appear in the text. All figures should appear in the text with titles and sources as follows:

Figure 1: School Enrollment 2003

Figure 2: Map Showing the Study Area
Source: Owusu-Sekyere (2016)

For Humanities and the Social Sciences the title should appear at the top of the
figures and the source at the bottom.
For the Sciences both title and source must appear at the bottom.

**Tables**
Tables should include only essential details. They should be given Arabic numerals and referred to in the text. All tables should appear in the text with titles (on top) and sources (at the bottom) as follows:

**Table 1: School Enrollment 2003**

Please ensure the figures and the tables included in the manuscript are placed next to the relevant text in the article. These should be editable text and not images. Please ensure that the data presented in them do not duplicate results described elsewhere in the article.

**REFERENCES IN-TEXT**
All references must conform with the APA Referencing style (7th edition). References cited in the text should agree with those in the reference list and vice versa (references listed and those cited in the main text). All titles in the reference list should not be abbreviated but rather spelt out. For example: World Health Organization [WHO] (2015)

Any references cited in the abstract must be given in full.

**Unpublished results** and **personal communications** mentioned in the text should be properly referenced in the text but not included in the reference list. The publication date should be preceded with "Personal communication" as follows:
(E. Alhassan, personal communication, January 5, 2019)
E. Alhassan (personal communication, January 5, 2019) informed the family of ...

**References in text** for a single author or works with two authors should be quoted as follows:
Kasise (2000) or (Kasise, 2000)
Kaleo and Bawumia (2004) or (Kaleo & Bawumia, 2004).

Works with three or more authors should be listed in all instances as follows:
(Smith et al., 2010) OR Smith et al. (2010) examined ...
When direct quotes are used, page number, page range, paragraph number, section number, table or figure number, or chapter number should be provided. For example, (Kaba, 2000:12).

Include quotes less than 40 words in the paragraph in quotation marks whilst that exceeding 40 words should be in block quote or a separate indented paragraph.
If the author is an organization or a government agency, mention the organization in the signal phrase or in the parenthetical citation the first time you cite the source.

Ghana Revenue Authority (2019) reported that …… OR (Ghana Revenue Authority, 2019)

If the organization has a well-known abbreviation, include the abbreviation in brackets the first time the source is cited and then use only the abbreviation in later citations. However, if no known abbreviation exists, use the organization’s name as it is.
For example;
First citation: (World Health Organization [WHO] 2015)
Subsequent citations: (WHO, 2015) or WHO (2015)

When the citation includes two or more works from different authors, order them alphabetically, separated by a semi-colon in parenthesis as follows:
(Kasise, 2000; Owusu-Sekyere, 2016)

But the narrative citation can be in any order.

When your parenthetical citation includes two or more works from the same author, list the years of publication in press citations last. Only list authors' surnames once for each list of dates.
For example;

When citing multiple works from multiple authors, present citations in alphabetical order (regardless of publication year) separated by a semi-colon.
For example;
(Abagale, 2017; Nyarko, 2009; Teye, 2018)

When citing authors with the same surnames, use first initials to differentiate works.
For example;
If you have multiple sources by the same author in the same year, add lowercase letters (a, b, c) to the year of publication in-text and in the reference list. For example:
(Husseini, 2018a; Husseini, 2018b)

Secondary citation is where you cite information that the author of your reference has also cited without personally reading the original work. Locating the original source is highly preferred.

In-text citation (example):
Ansah (2010) argued that... (as cited in Dery, 2014, p. 12).
Education is the key to national development (Ansah, 2010, as cited in Dery, 2014). Provide the full secondary source in the reference list.

REFERENCE LIST
A full reference list capturing author name, year of publication, title of work, edition or volume if any, and city and state of publication as well as publisher name in that order should be provided.

Apart from classics, use current date and references. Date and references more than 10 years are considered old and their use discouraged.

All references should appear at the end of the paper in alphabetical order, in strict accordance, as follows:
